Thanks to Liza Downie for sending me this photo from Ben Lawers after my [last post](#). I had questioned why the Loch Lomond and Trossachs National Park had just tendered for an automated number plate charging system when it had just installed new Pay and Display machines at Inveruglas – but perhaps they have already been stolen?! Or has the LLTNPA realised their plan for Pay and Display machines at the three car parks was too risky and they are now trying to shift the costs of providing equipment onto external providers?
